

GOLD: Right time to invest

17th Oct, 2016

From its peak of 2011 to the 2015 bottom, gold had fallen nearly 40% but it has been in an uptrend since the beginning of this year.

The current correction offers a good opportunity to invest in gold for long term.

In next few years, it can surpass its previous top and can rise up to Rs. 50,000 from current levels of near Rs. 29,600.

There are various options to invest in gold other than the physical gold, one can invest through gold ETF or also through gold mutual fund schemes. Main advantages are safety, no risk of impurity, and better liquidity.
