IPO FACT SHEET

IPO : Tempsens Instruments (India) Limited August 2026

Snapshot

Tempsens Instruments (India) Limited is a global player in thermal and cable solutions, offering a diversified portfolio of temperature sensing solutions, electrical heating products and specialised cables. Its products include thermocouples, RTDs, thermowells, infrared pyrometers, thermal imagers, industrial electrical heaters, temperature calibrators and industrial furnaces, serving varied industrial applications. Headquartered in Udaipur, Rajasthan, the company operates 15 manufacturing units across India and overseas markets including the UAE, South Korea, Indonesia, Germany and Poland. With decades of engineering expertise, backward-integrated manufacturing capabilities and a global customer base.

Opening Date	Thursday, August 20, 2026
Closing Date	Monday, August 24, 2026
Price Band	Rs. 285 to 300 per share
Bid Lot	50 Shares
Issue Size	2,16,66,666 shares (aggregating up to Rs. 650 Cr)
Fresh Issue	31,66,666 shares (aggregating up to Rs. 95 Cr)
Offer for Sale	1,85,00,000 shares (aggregating up to Rs. 555 Cr)
Registrar	Kfin Technologies Ltd.

Company Vision

Tempsens' vision is to strengthen its position as an integrated global thermal engineering and cable solutions provider by combining technology, engineering expertise and customer-focused innovation. The company aims to expand its product portfolio, integrate related product lines and deepen its presence across international markets. Its backward-integrated manufacturing capabilities, skilled workforce and R&D focus support the development of customised and high-quality solutions for critical industrial applications. Through its subsidiaries, joint ventures and expanding global footprint, Tempsens intends to serve a wider range of industries while building long-term customer relationships and enhancing its competitiveness in the global thermal solutions market.

NET Worth	497	431	181
Reserves and Surplus	465	427	203
Total Borrowing	78	72	30

Growth Prospects

Tempsens has promising growth prospects supported by increasing demand for temperature sensing, industrial heating and specialised cable solutions across sectors such as metals, petrochemicals, power, renewable energy, defence and process industries. Its expanding international presence and export-oriented business provide opportunities to capture growing global demand. The company's diversified product portfolio, backward integration, customisation capabilities and investment in R&D can support further market penetration. Tempsens also has opportunities to expand into newer geographies and strengthen its position in high-value applications. Its established manufacturing network and global subsidiaries and joint ventures provide a platform for scaling operations and increasing export sales.

Risk Assessment

Tempsens faces risks arising from its dependence on project and OEM business, as well as demand from key end-user industries such as metals and petrochemicals. Volatility, shortages or delays in raw-material supplies may affect production, costs and project execution. Dependence on a limited supplier base without definitive supply agreements could increase supply-chain vulnerability. The concentration of manufacturing facilities in Udaipur also creates location-specific operational risks. In addition, reliance on subsidiaries and joint ventures for international expansion may expose the company to strategic and operational challenges. Competition from low-cost alternatives and the need to successfully expand exports and new geographies remain important risks.
