

IPO : SRIT India Limited

September 2026

Snapshot

SRIT India Limited, incorporated in 1999 and headquartered in Bengaluru, is an information technology company providing technology solutions and services across healthcare, e-Governance, telecom and custom application development and integration. The company focuses on digital transformation through solution architecture, software development, implementation and managed services. Its healthcare offerings include hospital information systems, healthcare ERP, insurance and claims management solutions, while its e-Governance projects support digital public-service delivery. SRIT has delivered projects across healthcare, utilities, local governance and telecom sectors and serves clients in India and international markets. The company also emphasizes long-term public-private partnerships and collaborative operating models.

Company Vision

SRIT India Limited's vision is centered on enabling digital transformation through technology solutions across healthcare, e-Governance, telecom and other public-service domains. The company aims to use its domain expertise, technology capabilities and collaborative operating models to support organizations in modernizing processes and improving service delivery. Its focus on healthcare IT, digital governance, application development, infrastructure management and managed services reflects an objective of building scalable and integrated technology solutions. SRIT also emphasizes long-term public-private partnerships, which can support continued participation in large digitalization initiatives.

Growth Prospects

SRIT India Limited operates in areas supported by increasing digital adoption across healthcare, government services, telecom and other sectors. The company's experience in healthcare IT and e-Governance provides opportunities from continued modernization of public infrastructure and digital service delivery. Its healthcare solutions, including hospital information systems, healthcare ERP and claims management, can benefit from increasing digitization of healthcare processes. The broader IT-BPM sector is also seeing demand for digital transformation, cloud, analytics, AI and modernization services.

Risk Assessment

SRIT India Limited operates in a competitive and technology-driven industry where changes in technology, customer requirements and project execution can affect business performance. Its operations involve significant exposure to government and public-sector projects, making contract timelines, procurement processes and project implementation important considerations. The company also faces risks related to dependence on skilled technology professionals, cybersecurity, data protection and successful delivery of complex IT projects. Healthcare and e-Governance projects may involve regulatory and compliance requirements, while delays in client approvals or payments can affect operations. The company has also disclosed ongoing legal proceedings, including an arbitration matter, which represents an additional business consideration.
