## **Investment Rationale**

Argues for investing to combat inflation's erosive effects on household expenses (9-19% CAGR), education costs (10.5% inflation), and weddings (22-30%), which outpace traditional savings like FDs at 4-7.1%. It contrasts low-yield options (PPF 7.1% tax-free, gold/real estate ~11%) with superior mutual fund returns (large-cap 17.55%, mid/small-cap 22-23% over 10 years), demonstrating via examples how SIPs in equity funds meet goals like higher education (₹60L in 17 years via ₹9K/month at 12%) or marriage (₹1Cr in 16 years via ₹17.5K/month) more efficiently than FDs/PPF. Early investing leverages compounding (e.g., ₹5K/month from age 25 yields ₹3.25Cr by 65 at 12% vs. ₹1.5Cr from age 40), thriving amid market crises per Warren Buffett's wisdom.
